ISO 14001 : 2015
What is it?

An Environmental Management System (EMS) is a framework that allows an organization to consistently control its significant impacts on the environment, reduce the risk of potentially costly pollution incidents, ensure compliance with environmental legislation and continually improve its business operations.

ISO 14001 is an internationally accepted standard that defines the requirements for establishing, implementing and operating an Environmental Management System.

The ISO 14001 standard recognizes that organizations can be concerned about both their own profitability and managing environmental impacts. ISO 14001 integrates these two motives and provides a methodology to achieve an effective Environmental Management System.

In practice, the ISO management system offers a framework for resource use and disposition. It is recognized worldwide as a means to control costs, reduce risk and improve performance.

The top Management endorses both an Environmental and Safety Policy.

Jay Industries, Inc.

ISO 14001 : 2015
and Jay Industries, Inc.

Jay Industries environmental management system has been registered with the ISO 14001 standard since January 2003.

As a company we have a commitment to continual improvement by identifying our activities, operations, processes and products that have significant environmental impacts. We use aspect and impact information to help determine the best environmental management practices to implement.

Management programs are established at each division to help reduce negative impacts. Each Division reviews the entire system yearly to ensure the elements of the ISO 14001 : 2015 are satisfied and that we continue to preserve and improve the environment.

Jay Industries, Inc.
Corporate Environmental Policy

As a member of the community, **Jay Industries, Inc. is dedicated to preserving and improving the environment.** This dedication is not limited to the environmental regulations that govern the industry, but extends to include activities that may impact or concern the community.

Jay Industries, Inc. is committed to assess the environmental aspects of its operation in order to better establish objectives and targets for improving the environment and its manufacturing practices.

Jay Industries, Inc. will strive to:

1. Comply with applicable environmental laws, regulations, and customer requirements.

2. Define roles, and responsibilities, and provide proper training for management and employees in all areas of the facility to ensure compliance with the Environmental Management System.

3. Periodically evaluate objectives and targets that have been set in order to ensure attention to all potential environmental contributors.

4. Reduce and prevent pollution wherever possible throughout its manufacturing processes.

5. Maintain good communications with the community and other interested parties with concern to our environmental impacts and performance.

6. Commit to an attitude of Continuous Improvement.
