

## Do you know the new GHS Hazcom Label requirements?

1. Signal Word – Level of hazard, like Danger or Warning
2. Pictograms – Health, physical, and environmental hazard information inside a diamond outline
3. Product Name – Helps you find the chemical in the SDS
4. Hazard Statements – Nature and degree of hazard
5. Precautionary Statement – Phrases about general, response, storage or disposal precautions
6. Manufacturer Info – Name, address and phone number

All Chemicals must be labeled and All Labels must have these items.
