

Jay Industries, Inc.
Stormwater Pollution Prevention
Spill Prevention Control & Countermeasure

Name: _____ Date: _____ Plant: _____

1. If you spill a small amount of dry material, such as a powder, outdoors, what should you do about it?
 - a. Hose it down into the nearest storm drain or ditch
 - b. Let the wind blow it away naturally
 - c. Clean it up promptly and thoroughly
 - d. Notify the local fire department

2. If you must temporarily store materials or equipment OUTDOORS, that could add to stormwater pollution, how should this be done?
 - a. Cover them with a water proof tarp
 - b. Secure the tarp so it doesn't blow off
 - c. Check the tarp regularly to be sure it is not loose
 - d. All of the above

3. After you have finished pumping a liquid through a hose into a vessel or container, you should...
 - a. Inspect the hose for leaks
 - b. Drain the hose into the receiving vessel or container and cap it before putting it away
 - c. Place a drop cloth under the receiving vessel or container
 - d. Place a drip bucket under any connections

4. Before starting to paint outdoors, you should...
 - a. Set up the work site over the closest storm drain
 - b. Place a drop cloth under the object to be painted
 - c. Notify your plant's emergency coordinator
 - d. Place a water proof tarp or cover over the object to be painted

5. If you use portable containers of liquid in any outdoor work, how should they be handled?
 - a. Keep lids and caps securely in place unless actually using the container
 - b. Place inside of secondary containment such as a pan or tray
 - c. Put the containers away indoors when finished
 - d. All of the above

6. Which of the following are likely consequences of stormwater pollution?
 - a. Poor air quality
 - b. Explosions or fires
 - c. Damaged wildlife habitat
 - d. Power outages

7. During transfer operations of oil from one container to another, it is permissible to leave a pump unattended as long as it is a short time.

_____ True _____ False

8. If you have supplies or materials that need to be stored somewhere, what is the preferred location?
 - a. Store indoors or in a shed
 - b. Store outdoors under a tarp
 - c. Store outdoors but inside of secondary containment
 - d. Store outdoors near a downspout

9. When disposing of scrap or wastes outdoors, which of the following is the proper method?
 - a. Place wastes in a lidded or leak-tight dumpster or receptacle
 - b. Dump them in any vacant area
 - c. Hose or wash them into a storm drain or ditch
 - d. Dispose inside of secondary containment

10. Any container of oil containing 55 gallons or more is required to have secondary containment.
_____ True _____ False

11. Which of the following are forms of secondary containment?
 - a. Double walled tank
 - b. Yellow overpack drum
 - c. Spill tray
 - d. All of the above

12. Which of the following is the best place to off-load a delivery truck?
 - a. Outdoors in the parking lot
 - b. Near a storm drain inlet
 - c. At a loading dock with a roof overhand
 - d. At the facility truck gate

13. If you are replacing an hydraulic line outdoors, you should first drain the line and then...
 - a. Have a water hose available for washing the area down when you finish
 - b. Place a drip bucket under the line before disconnecting it
 - c. When finished, empty the drip bucket over any paved surface
 - d. All of the above

14. Who is responsible for using proper stormwater pollution prevention practices at work?
 - a. I am
 - b. Fire Department
 - c. E.P.A.
 - d. SWPPP

15. If you discover that a leak or spill threatens to enter a storm drain inlet, you should...
 - a. Protect the drain inlet by placing absorbents around it or a cover over it
 - b. Clean up the spill if it is non-hazardous and the available spill clean-up supplies are adequate
 - c. Notify the Emergency Coordinator if the spill is hazardous or too large to clean-up
 - d. All of the above

16. The yellow barrel of a large spill kit can be emptied out and used as a container for a leaky drum.
_____ True _____ False
